	(0477) Of the 17 176 genes that inc	lude the cDNAs of I	he nresent invention	nenes whose expr	ession levels were

[0477] Of the 17,176 genes that include the cDNAs of the present invention, genes whose expression levels were high enough to detect in each of the NCRRM, NCRRP, NESOP, NETRP, NHNPC, and NOVAR libraries were analyzed for expression frequency. The analysis results are described below. Each is a relative value, where the expression level over all tissues is taken as 100. The larger this value, the greater the level of expression.

55

The analysis results are described below. Each is a relative value, where the expression level over all tissues is taken as 100. The larger this value, the greater the level of expression.

	[0/82] Of the 17	176 genes that incl	ude the cDNAs of th	a present invention	genes whose ever	ession levels were

[0482] Of the 17,176 genes that include the cDNAs of the present invention, genes whose expression levels were high enough to detect in each of the SALGL, SKMUS, SKNMC, SKNSH, SMINT, SPLEN, and STOMA libraries were analyzed for expression frequency. The analysis results are described below. Each is a relative value, where the expression level over all tissues is taken as 100. The larger this value, the greater the level of expression.

Table 37
